The closest like-for-like alternative is the Morphy Richards 6.5L Easy Time Slow Cooker. It matches the Crock-Pot's family-friendly size, so it's the one to pick if you regularly cook for 6–8 people and want similar batch-cooking performance for casseroles, chilli, pulled pork and curries. It's better than the Crock-Pot if you like automatic heat settings, a countdown indicator and hob-proof pot convenience, but it's more expensive and doesn't have quite the same simple set-and-forget charm. Choose this if you want a modern, feature-rich slow cooker without giving up capacity.

For a cheaper and slightly smaller digital option, the Crockpot Digital Slow Cooker 3.5L is a smart buy. It's much easier to live with on a smaller UK kitchen counter, uses a standard UK 3-pin plug, and the programmable timer is ideal if you want dinner ready after work without overcooking. What it loses versus the 6.5L original is sheer volume — it's better for 3–4 people than big Sunday batch cooks. Pick this if you're cooking for a smaller household or want something compact, tidy and budget-friendly.

If you want a mid-size upgrade, the Crockpot Lift and Serve Digital Slow Cooker 4.7L hits a lovely sweet spot. It's larger than the 3.5L model but still less bulky than the 6.5L Crock-Pot, and the hinged lid makes serving easier with less mess. Compared with the main product, it's better for everyday family meals and space-saving practicality, but it won't stretch quite as far for big gatherings. This is the one to choose if you want a versatile all-rounder for 4–5 people.

The Morphy Richards 3.5L Sear and Stew Slow Cooker is a strong value pick for smaller households that still want good flavour. Its big advantage is the non-stick aluminium pot, which can go from hob to slow cooker, so you can brown meat first without dirtying another pan — brilliant for richer stews and braises. Against the Crock-Pot 6.5L, it's obviously much smaller and not ideal for feeding a crowd, but it's cheaper, compact, and very easy to clean. Choose it if you cook for 2–4 people and love proper one-pot comfort food.

The Yum Asia Sakura Rice Cooker isn't a direct replacement for the Crock-Pot, but it's worth considering if your real goal is versatile meal prep rather than just slow cooking. It's far more expensive, but it brings advanced fuzzy logic, a ceramic bowl and multiple rice and multicook functions, so it's excellent for rice, grains and some one-pot dishes. What it does worse is classic slow-cooker simplicity and large stew capacity. Buy this instead if you want a premium multi-cooker for rice-heavy meals and don't mind paying for it.

Still Buy the Original If...

Stick with the original Crock-Pot SCV655B if you want the simplest, best-value 6.5L slow cooker for feeding 8+ people. It's a great no-fuss choice for big family dinners, batch cooking and low-effort comfort food.
